The British Nutrition Foundation (BNF) was established over 40 years ago and has developed a reputation for delivering objective, evidence-based information on food and nutrition in the context of health and lifestyle. BNF’s work is conducted and communicated through a unique blend of nutrition science, education and media activities; accurate interpretation of nutrition science is at the heart of all we do. BNF’s strong governance is broad based but dominated by the academic community and we are honoured to have Her Royal Highness, The Princess Royal, as our patron. BNF is an independent organisation with charitable status that now attracts funding from a variety of sources, including contracts with the European Commission, national government departments and agencies; food producers and manufacturers, retailers and food service companies; grant providing bodies, trusts and other charities. Registered charity no. 251 681.

The image contains a registration form for a conference. The form includes fields for name, job title, organization, address, postcode, country, telephone, fax, email, dietary requirements, and how the person heard about the conference. There is also a table listing registration fees, payment methods, and a section for additional attendees. The form instructs on how to send the completed form by fax or post and provides contact information for Mrs. Christine Price.

Closing Date for Registration 25th September 2009
